

HDMI LKV2000N

VGA to AV Converter

Manufacturer: [MPSAT](#)

Description LKV2000N PC to TV Converter-Composite & S-Video & VGA Loophrough

Want to hook up your computer to your TV but your TV is without a VGA input? Then LKV2000N is your solution. LKV2000N converts PC VGA to composite (Yellow RCA) and/or S-video TV display signal. It is with a VGA pass through so that you can keep your computer monitor connected while sending a signal to the TV. All outputs are loophrough, display simultaneously. It is with fine tuning control to adjust the picture to your preference. It draws power from an available USB port using a supplied USB power cable. No external power supply is needed.

Features

- 1 Input: 1 X VGA;
- 3 Loop-through Outputs: 1 X VGA, 1 X Composite Video, 1 X S-video;
- PC VGA resolution: 640X480 (60/72/75/85Hz), 800X600 (60/75Hz), 1024X768 (60/75Hz). Higher resolutions are supported, while the lower the resolution is, the better the picture effect will be.
- On Screen Display (OSD):
- Plug and Play. No software driver is needed;
- Both PAL / NTSC are compatible;
- HSIZE, VSIZE, BRIGHTNESS, CONTRAST, HUE, SATURATION, SHARPNESS and OSD -BACKGROUND color are adjustable.
- DC: 5V/1A
