

HDMI LKV372PRO

HDMI Extender over Cat6 with Loop-out and IR 60M

Manufacturer: [MPSAT](#)

Description

LKV372Pro HDMI extender delivers 1080P HDMI signal up to 60m/196ft over single CAT6 network cable, it supports IR signal transmission for remote control the source device, build-in HDMI loop-out for local display, lossless quality and auto adjustment to match the cable length of CAT6.

- HDMI over single CAT6 cable transmission up to 60m/196ft
- HDMI loop-out for local display or monitoring function
- Supports AV signal uncompressed & lossless transmission
- Auto adjustment to match the cable length from 1-60m of CAT6
- Pure hardware transmission without any software or driver
- Full HD 1080P transmission to make video image more vivid
- IR signal transmission for controlling the source device

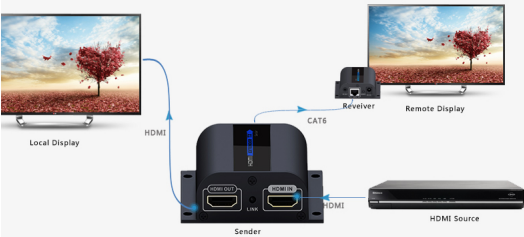

HDMI Single Cable Transmission

It extends HDMI 1080p AV signal to at least 60M with cat5 or higher level cables.

HDMI Loop-out for Local Display

This extender provides an HDMI local display output for monitoring function to ensure High-Definition digital signals are transmitted in different locations.

HDMI Lossless Transmission

It extends HDMI AV signal to synchronous output. Video display is as fluent as direct connection.

Support uncompressed HDMI signal

Support uncompressed audio output (such as LPCM)

Color reproduction technology

Auto Adjustment to Match Cable Length

Adjust the specification automatically for different cable lengths 1-60m to achieve the best display.
