

LNB AX-KON0054

LNB QUATTRO

Manufacturer: [AX-Technologies](#)

Description

Professional series of LNBs, quality conditions, exceptional precision of workmanship, perfect stabilization and resistance to changing weather conditions.

QUATTRO LNBs can be run in a TV-SAT installation ONLY via the multiswitch! It is not possible to choose a QUATTRO LNB directly to the TV-SAT tuner.

QUATTRO OPTICUM AX BLACK BUSTER LNB is a high-quality, branded German LNB, designed to work with a multiswitch. Characterized by a 0.1dB phase noise attenuator (the lower this coefficient, the better the LNB). Precise workmanship and high technical quality parameters translate into less impact of weather conditions on the quality of the test received.

Technical specifications:

Input Internet:

- lower band, vertical polarization - 10.7-11.7 GHz
- lower band, horizontal polarization - 10.7-11.7 GHz
- upper band, vertical polarization - 11.7-12.75 GHz
- upper band, horizontal polarization - 11.7-12.75 GHz

oscillator prices:

- LOW 9.75 GHz
- HIGH 10.60 GHz

Output quality:

- lower band 950-1950MHz
- upper band 1100-2150MHz

- signal switching to bands - 22KHz
- noise figure - 0.1dB
- handle diameter - 40mm
