DTVIPI

IP to TS remultiplexer for CMI- & DTVRack

Manufacturer: ANTTRON

Description
The DTV-IPi module purpose is to capture SPTS/MPTS services from several ethernet unicast and/or muticast ports, multiplex them in a single TS that is provided to the DTVRack backplane. The extracted services can then be reorganized in multiple TS and modulated in DVB-C, DVB-T or even streamed again in IP using various output modules.
