

RCON FT-UNIVERSAL

Programmable 4 IN 1 Remote Control

Description

- The LOR 7000 is the most advanced model of Ftelectronics. It is a programmable remote control ideal for replacing your old satellite or terrestrial digital receiver control, TV, DVD player and more. The LOR-7000 can be easily programmed. , by connecting to our FT-RCcreator program. It can control up to 4 devices and is characterized by excellent build quality and good key feel. There is still the option of detecting an unknown remote, from any one that is in operation. The LOR 7000 also has a USB port, which you can connect directly to your computer. There are two main modes of programming: 1. With the FT-RCCreator program, which we download here :

[Program For Lor-7000](#)

2. With a learning function (via the FT-RCcreator program) infrared copy-key of any remote control is sufficient to operate.
